

# Contents

Preface	xiii
Common Symbols	xvii
1 Introduction	1
I Introduction to Dynamics	9
2 Introduction to Programming	11
2.1 Basic Techniques	11
2.1.1 Algorithms	11
2.1.2 Coding: First Steps	14
2.1.3 Modules and Scripts	19
2.1.4 Flow Control	21
2.2 Program Design	25
2.2.1 User-Defined Functions	25
2.2.2 More Data Types	27
2.2.3 Object-Oriented Programming	29
2.3 Commentary	33
3 Analysis in Metric Space	35
3.1 A First Look at Metric Space	35
3.1.1 Distances and Norms	36
3.1.2 Sequences	38
3.1.3 Open Sets, Closed Sets	41
3.2 Further Properties	44
3.2.1 Completeness	44
3.2.2 Compactness	46

3.2.3	Optimization, Equivalence	48
3.2.4	Fixed Points	51
3.3	Commentary	54
<b>4</b>	<b>Introduction to Dynamics</b>	<b>55</b>
4.1	Deterministic Dynamical Systems	55
4.1.1	The Basic Model	55
4.1.2	Global Stability	59
4.1.3	Chaotic Dynamic Systems	62
4.1.4	Equivalent Dynamics and Linearization	66
4.2	Finite State Markov Chains	68
4.2.1	Definition	68
4.2.2	Marginal Distributions	72
4.2.3	Other Identities	76
4.2.4	Constructing Joint Distributions	80
4.3	Stability of Finite State MCs	83
4.3.1	Stationary Distributions	83
4.3.2	The Dobrushin Coefficient	88
4.3.3	Stability	90
4.3.4	The Law of Large Numbers	93
4.4	Commentary	96
<b>5</b>	<b>Further Topics for Finite MCs</b>	<b>99</b>
5.1	Optimization	99
5.1.1	Outline of the Problem	99
5.1.2	Value Iteration	102
5.1.3	Policy Iteration	105
5.2	MCs and SRSs	107
5.2.1	From MCs to SRSs	107
5.2.2	Application: Equilibrium Selection	110
5.2.3	The Coupling Method	112
5.3	Commentary	116
<b>6</b>	<b>Infinite State Space</b>	<b>117</b>
6.1	First Steps	117
6.1.1	Basic Models and Simulation	117
6.1.2	Distribution Dynamics	122
6.1.3	Density Dynamics	125
6.1.4	Stationary Densities: First Pass	129
6.2	Optimal Growth, Infinite State	133

6.2.1	Optimization	133
6.2.2	Fitted Value Iteration	135
6.2.3	Policy Iteration	142
6.3	Stochastic Speculative Price	145
6.3.1	The Model	145
6.3.2	Numerical Solution	150
6.3.3	Equilibria and Optima	153
6.4	Commentary	155

## II Advanced Techniques 157

7	Integration	159
7.1	Measure Theory	159
7.1.1	Lebesgue Measure	159
7.1.2	Measurable Spaces	163
7.1.3	General Measures and Probabilities	166
7.1.4	Existence of Measures	168
7.2	Definition of the Integral	171
7.2.1	Integrating Simple Functions	171
7.2.2	Measurable Functions	173
7.2.3	Integrating Measurable Functions	177
7.3	Properties of the Integral	178
7.3.1	Basic Properties	179
7.3.2	Finishing Touches	180
7.3.3	The Space $L_1$	183
7.4	Commentary	186
8	Density Markov Chains	187
8.1	Outline	187
8.1.1	Stochastic Density Kernels	187
8.1.2	Connection with SRSs	189
8.1.3	The Markov Operator	195
8.2	Stability	197
8.2.1	The Big Picture	197
8.2.2	Dobrushin Revisited	201
8.2.3	Drift Conditions	204
8.2.4	Applications	207
8.3	Commentary	210

<b>9 Measure-Theoretic Probability</b>	<b>211</b>
9.1 Random Variables	211
9.1.1 Basic Definitions	211
9.1.2 Independence	215
9.1.3 Back to Densities	216
9.2 General State Markov Chains	218
9.2.1 Stochastic Kernels	218
9.2.2 The Fundamental Recursion, Again	223
9.2.3 Expectations	225
9.3 Commentary	227
<b>10 Stochastic Dynamic Programming</b>	<b>229</b>
10.1 Theory	229
10.1.1 Statement of the Problem	229
10.1.2 Optimality	231
10.1.3 Proofs	235
10.2 Numerical Methods	238
10.2.1 Value Iteration	238
10.2.2 Policy Iteration	241
10.2.3 Fitted Value Iteration	244
10.3 Commentary	246
<b>11 Stochastic Dynamics</b>	<b>247</b>
11.1 Notions of Convergence	247
11.1.1 Convergence of Sample Paths	247
11.1.2 Strong Convergence of Measures	252
11.1.3 Weak Convergence of Measures	254
11.2 Stability: Analytical Methods	257
11.2.1 Stationary Distributions	257
11.2.2 Testing for Existence	260
11.2.3 The Dobrushin Coefficient, Measure Case	263
11.2.4 Application: Credit-Constrained Growth	266
11.3 Stability: Probabilistic Methods	271
11.3.1 Coupling with Regeneration	272
11.3.2 Coupling and the Dobrushin Coefficient	276
11.3.3 Stability via Monotonicity	279
11.3.4 More on Monotonicity	283
11.3.5 Further Stability Theory	288
11.4 Commentary	293

<b>12 More Stochastic Dynamic Programming</b>	<b>295</b>
12.1 Monotonicity and Concavity	295
12.1.1 Monotonicity	295
12.1.2 Concavity and Differentiability	299
12.1.3 Optimal Growth Dynamics	302
12.2 Unbounded Rewards	306
12.2.1 Weighted Supremum Norms	306
12.2.2 Results and Applications	308
12.2.3 Proofs	311
12.3 Commentary	312
 <b>III Appendixes</b>	 <b>315</b>
<b>A Real Analysis</b>	<b>317</b>
A.1 The Nuts and Bolts	317
A.1.1 Sets and Logic	317
A.1.2 Functions	320
A.1.3 Basic Probability	324
A.2 The Real Numbers	327
A.2.1 Real Sequences	327
A.2.2 Max, Min, Sup, and Inf	331
A.2.3 Functions of a Real Variable	334
 <b>B Chapter Appendixes</b>	 <b>339</b>
B.1 Appendix to Chapter 3	339
B.2 Appendix to Chapter 4	342
B.3 Appendix to Chapter 6	344
B.4 Appendix to Chapter 8	345
B.5 Appendix to Chapter 10	347
B.6 Appendix to Chapter 11	349
B.7 Appendix to Chapter 12	350
 <b>Bibliography</b>	 <b>357</b>
 <b>Index</b>	 <b>367</b>
