Introduction	1
Part I: Concepts and practices	5
1 Music and mixing	7
Music: an extremely short introduction	7
The role and importance of the mix	8
The perfect mix	11
2 Some axioms and other gems	14
Louder is better	14
Percussives weigh less	16
Importance	17
Natural vs. artificial	17
3 Learning to mix	20
What makes a great mixing engineer?	20
The ability to work fast	24
Methods of learning	24
Mixing analysis	25
Reference tracks	27
4 The process of mixing	30
Mixing and the production chain	30
The mix as a composite	34
Where to start	34
Deadlocks	41
The raw tracks factor	41
Milestones	42
Finalizing and stabilizing the mix	42

5	Related issues	45
	How long does it take?	45
	Breaks	46
	Using solos	46
	Mono listening	47
	Housekeeping	48
	Mix edits	50
	Mastering	50
6	Mixing and the brain	53
	Dual process theory	53
	The power of the unconscious	55
	Intuition	58
	Thinking without thinking	60
	Emotions	61
	Change	62
	Creativity	64
7	Mixing domains and objectives	66
	Mixing objectives	66
	Definition	67
	Interest	68
	Frequency domain	69
	Level domain	73
	Stereo domain	76
	Depth	79
Part II: Tools		83
8	Monitoring	85
	How did we get here?	85
	Choosing monitors	89
	The room factor	92
	Positioning monitors	96
	Headphone mixing	100
9	Meters	105
	Amplitude vs. level	105
	Mechanical and bar meters	107
	Peak meters	107
	Average meters	107
	Phase meters	109

10 Mixing consoles	111
Buses	112
Processors vs. effects	112
Basic signal flow	114
The importance of signal flow diagrams	120
Groups	125
In-line consoles	134
The monitor section	138
Correct gain structure	144
The digital console	146
11 Software mixers	149
Tracks and mixer strips	149
Routing	154
The internal architecture	157
12 Phase	170
What is phase?	170
Problems	172
Tricks	174
13 Faders	183
Types	183
Scales	185
Working with faders	187
14 Panning	190
How stereo works	190
Pan controls	192
Types of track	200
Panning techniques	204
Beyond pan pots	208
15 Equalizers	210
Applications	210
The frequency spectrum	214
Types and controls	218
Graphic equalizers	234
In practice	237
Equalizing various instruments	253

16	Introduction to dynamic range processors	266
	Dynamic range	266
	Dynamics	268
	Dynamic range processors in a nutshell	269
17	Compressors	274
	The course of history	275
	The sound of compressors	277
	Principle of operation and core controls	278
	Additional controls	290
	Controls in practice	298
	Applications	314
	Tricks	324
	More on compressors	329
18	Limiters	337
19	Gates	339
	Controls	340
	Applications	352
	In practice	356
	Tricks	359
20	Expanders	366
	Controls	367
	In practice	369
	Upward expanders	372
21	Duckers	375
	Operation and controls	375
	Applications	378
22	Delays	381
	Delay basics	381
	Types	385
	In practice	390
	Applications	395
23	Other modulation tools	398
	Vibrato	398
	ADT	399
	Flanging	401
	Phasing	403
	Tremolo	404

24 Reverbs	406
What is reverb?	406
Applications	406
Types	411
Reverb programs	419
Reverb properties and parameters	422
Early reflections (ERs)	425
Reverbs and stereo	434
Other reverb types	438
Reverbs in practice	444
25 Distortion	451
Background	451
Distortion basics	451
Ways to generate distortion	454
26 Drum triggering	460
Methods of drum triggering	461
27 Other tools	465
MS	465
Pitch shifters and harmonizers	469
Exciters and enhancers	470
Transient designers	472
28 Automation	474
Automation engines	475
The automation process	475
Automation alternatives	478
Control surfaces	479
Part III: Sample mixes	483
29 "Show Me" (rock 'n' roll)	485
Drums	486
Bass	488
Rhythm guitar	488
Lead guitar	489
Vocal	490
30 "It's Temps Pt. II" (hip-hop/urban/grime)	492
Beat	492
Bass	495

30a. Intro	Other tracks	496
	Vocals	500
31	"Donna Pomini" (techno)	506
	Ambiance reverb	506
17. Cont	Beat	507
	Sound FX	512
	Bass	513
	Vocal	514
	Other elements	514
32	"The Hustle" (DnB)	519
	Ambiance reverb	519
	Drums	520
	Motif elements	525
18. Un	Pads	528
68a	Horns and brass	529
19. C	Risers	531
	Strings	532
33	"Hero" (rock)	533
	Drums	534
	Bass	539
20. Exp	Rhythm guitar	540
	Lead guitar	543
87a	Vocals	543
Appendix A: The science of bouncing		547
Appendix B: Notes-to-frequencies chart		553
Appendix C: Delay time chart		554
Index		565
20a	Delay time	565
20b	Notes	565
20c	In practice	565
20d	Applications	565
21	Other modulation	565
21a	Reverb	565
21b	Dist	565
21c	Chorus	565
21d	Phasing	565
21e	Tremolo	565
