<i>About the Authors</i>	xv
<i>I: Fundamentals of Sound</i>	I
<i>Chapter 1: Audio Principles</i>	3
1.1 The Physics of Sound	3
1.2 Wavelength	4
1.3 Periodic and Aperiodic Signals	5
1.4 Sound and the Ear	6
1.5 The Cochlea	9
1.6 Mental Processes	11
1.7 Level and Loudness	14
1.8 Frequency Discrimination	16
1.9 Frequency Response and Linearity	20
1.10 The Sine Wave	22
1.11 Root Mean Square Measurements	25
1.12 The Decibel	26
1.13 Audio Level Metering	30
References	32
<i>Chapter 2: Measurement</i>	33
2.1 Concepts Underlying the Decibel and its Use in Sound Systems	33
2.2 Measuring Electrical Power	38
2.3 Expressing Power as an Audio Level	39
2.4 Conventional Practice	40
2.5 The Decibel in Acoustics— L_p , L_w , and L_f	42
2.6 Acoustic Intensity Level (L_I), Acoustic Power Level (L_W), and Acoustic Pressure Level (L_p)	44
2.7 Inverse Square Law	46
2.8 Directivity Factor	47

2.9	Ohm's Law	47
2.10	A Decibel is a Decibel is a Decibel	48
2.11	Older References	48
2.12	The Equivalent Level (L_{EQ}) in Noise Measurements	51
2.13	Combining Decibels	54
2.14	Combining Voltage	58
2.15	Using the Log Charts	58
2.16	Finding the Logarithm of a Number to Any Base	60
2.17	Semitone Intervals	61
2.18	System Gain Changes	62
2.19	The VU and the Volume Indicator Instrument	62
2.20	Calculating the Number of Decades in a Frequency Span	68
2.21	Deflection of the Eardrum at Various Sound Levels	69
2.22	The Phon	70
2.23	The Tempered Scale	73
2.24	Measuring Distortion	73
2.25	The Acoustical Meaning of Harmonic Distortion	74
2.26	Playback Systems in Studios	76
2.27	Decibels and Percentages	77
2.28	Summary	79
	Further Reading	79
Chapter 3: Acoustic Environment		81
3.1	The Acoustic Environment	81
3.2	Inverse Square Law	82
3.3	Atmospheric Absorption	84
3.4	Velocity of Sound	85
3.5	Temperature-Dependent Velocity	88
3.6	The Effect of Altitude on the Velocity of Sound in Air	88
3.7	Typical Wavelengths	89
3.8	Doppler Effect	90
3.9	Reflection and Refraction	91
3.10	Effect of a Space Heater on Flutter Echo	92
3.11	Absorption	94
3.12	Classifying Sound Fields	97

3.13	The Acoustic Environment Indoors	102
3.14	Conclusion	112
	Further Reading	113
II: Audio Electronics.....		115
Chapter 4: Components		117
4.1	Building Block Components	117
Chapter 5: Power Supply Design		139
5.1	High Power Systems	139
5.2	Solid-State Rectifiers	143
5.3	Music Power.....	144
5.4	Influence of Signal Type on Power Supply Design	144
5.5	High Current Power Supply Systems	146
5.6	Half-Wave and Full-Wave Rectification	147
5.7	Direct Current Supply Line Ripple Rejection.....	147
5.8	Voltage Regulator Systems	148
5.9	Series Regulator Layouts	150
5.10	Overcurrent Protection	152
5.11	Integrated Circuit (Three Terminals) Voltage Regulator ICs	153
5.12	Typical Contemporary Commercial Practice	157
5.13	Battery Supplies	159
5.14	Switch-Mode Power Supplies	159
	Reference	159
III: Preamplifiers and Amplifiers		161
Chapter 6: Introduction to Audio Amplification.....		163
Chapter 7: Preamplifiers and Input Signals		167
7.1	Requirements	167
7.2	Signal Voltage and Impedance Levels	167
7.3	Gramophone Pick-Up Inputs	169
7.4	Input Circuitry	171
7.5	Moving Coil Pick-up Head Amplifier Design	175
7.6	Circuit Arrangements	176

7.7	Input Connections	183
7.8	Input Switching	184
7.9	Preamplifier Stages	186
7.10	Linearity	188
7.11	Noise Levels	197
7.12	Output Voltage Characteristics	198
7.13	Voltage Amplifier Design	200
7.14	Constant-Current Sources and "Current Mirrors"	202
7.15	Performance Standards	209
7.16	Audibility of Distortion	212
7.17	General Design Considerations	218
7.18	Controls	219
	References	239
Chapter 8: Interfacing and Processing		241
8.1	The Input	241
8.2	Radio Frequency Filtration	252
8.3	Balanced Input	253
8.4	Subsonic Protection and High-Pass Filtering	257
8.5	Damage Protection	263
8.6	What Are Process Functions?	267
8.7	Computer Control	278
	References	280
Chapter 9: Audio Amplifiers		283
9.1	Junction Transistors	283
9.2	Control of Operating Bias	286
9.3	Stage Gain	288
9.4	Basic Junction Transistor Circuit Configurations	289
9.5	Emitter-Follower Systems	291
9.6	Thermal Dissipation Limits	294
9.7	Junction Field Effect Transistors (JFETs)	295
9.8	Insulated Gate FETs (MOSFETs)	299
9.9	Power BJTs vs Power MOSFETs as Amplifier Output Devices	303
9.10	U and D MOSFETs	305
9.11	Useful Circuit Components	307

9.12	Circuit Oddments	309
9.13	Slew Rate Limiting	311
	References	312
Chapter 10: Audio Amplifier Performance		313
10.1	A Brief History of Amplifiers	313
10.2	Amplifier Architectures	314
10.3	The Three-Stage Architecture	314
10.4	Power Amplifier Classes	317
10.5	AC- and DC-Coupled Amplifiers	325
10.6	Negative Feedback in Power Amplifiers	330
	References	334
Chapter 11: Valve (Tube-Based) Amplifiers		337
11.1	Valves or Vacuum Tubes	337
11.2	Solid-State Devices	349
11.3	Valve Audio Amplifier Layouts	350
11.4	Single-Ended Versus Push-Pull Operation	352
11.5	Phase Splitters	355
11.6	Output Stages	358
11.7	Output (Load-Matching) Transformer	360
11.8	Effect of Output Load Impedance	364
11.9	Available Output Power	365
	References	366
Chapter 12: Negative Feedback		367
12.1	Amplifier Stability and Negative Feedback	367
12.2	Maximizing Negative Feedback	377
12.3	Maximizing Linearity Before Feedback	378
	Further Reading	379
Chapter 13: Noise and Grounding		381
13.1	Audio Amplifier Printed Circuit Board Design	381
13.2	Amplifier Grounding	390
13.3	Ground Loops: How They Work and How to Deal with Them	393
13.4	Class I and Class II	400
13.5	Mechanical Layout and Design Considerations	401

IV: Digital Audio	407
Chapter 14: Digital Audio Fundamentals	409
14.1 Audio as Data	409
14.2 What is an Audio Signal?	411
14.3 Why Binary?	414
14.4 Why Digital?	418
14.5 Some Digital Audio Processes Outlined	420
14.6 Time Compression and Expansion	423
14.7 Error Correction and Concealment	425
14.8 Channel Coding	430
14.9 Audio Compression	431
14.10 Disk-Based Recording	432
14.11 Rotary Head Digital Recorders	432
14.12 Digital Audio Broadcasting	434
14.13 Networks	434
References	436
Chapter 15: Representation of Audio Signals	437
15.1 Introduction	437
15.2 Analogue and Digital	437
15.3 Elementary Logical Processes	443
15.4 The Significance of Bits and Bobs	445
15.5 Transmitting Digital Signals	448
15.6 The Analogue Audio Waveform	451
15.7 Arithmetic	458
15.8 Digital Filtering	467
15.9 Other Binary Operations	476
15.10 Sampling and Quantizing	478
15.11 Transform and Masking Coders	494
References	495
Chapter 16: Compact Disc	497
16.1 Problems with Digital Encoding	497
16.2 The Record-Replay System	502
16.3 The Replay System	505

16.4	Error Correction	520
	References	524
Chapter 17: Digital Audio Recording Basics		525
17.1	Types of Media	525
17.2	Recording Media Compared	533
17.3	Some Digital Audio Processes Outlined	535
17.4	Hard Disc Recorders	550
17.5	The PCM Adaptor	553
17.6	An Open Reel Digital Recorder	554
17.7	Rotary Head Digital Recorders	556
17.8	Digital Compact Cassette	562
17.9	Editing Digital Audio Tape	563
	References	566
Chapter 18: Digital Audio Interfaces		567
18.1	Digital Audio Interfaces	567
18.2	MADI (AES10-1991) Serial Multichannel Audio Digital Interface	575
Chapter 19: Data Compression		579
19.1	Lossless Compression	580
19.2	Intermediate Compression Systems	582
19.3	Psychoacoustic Masking Systems	583
19.4	MPEG Layer 1 Compression (PASC)	583
19.5	MPEG Layer 2 Audio Coding (MUSICAM)	586
19.6	MPEG Layer 3	587
19.7	MPEG-4	589
19.8	Digital Audio Production	592
Chapter 20: Digital Audio Production		593
20.1	Digital Audio Workstations (DAWs)	593
20.2	Audio Data Files	600
20.3	Sound Cards	602
20.4	PCI Bus Versus ISA Bus	602
20.5	Disks and Other Peripheral Hardware	603
20.6	Hard Drive Interface Standards	604

20.7	Digital Noise Generation—Chain Code Generators	606
	References	609
Chapter 21: Other Digital Audio Devices		611
21.1	Video Recorders	611
21.2	High Definition Compatible Digital (HDCD)	612
21.3	CD Writers	612
21.4	MPEG Systems	620
21.5	MP3	625
21.6	Transcribing a Recording by Computer	626
21.7	WAV Onward	629
21.8	DAM CD	630
21.9	DVD and Audio	631
V: Microphone and Loudspeaker Technology		637
Chapter 22: Microphone Technology		639
22.1	Microphone Sensitivity	639
22.2	Microphone Selection	643
22.3	Nature of Response and Directional Characteristics	647
22.4	Wireless Microphones	657
22.5	Microphone Connectors, Cables, and Phantom Power	666
22.6	Measurement Microphones	671
	Further Reading	673
Chapter 23: Loudspeakers		675
23.1	Radiation of Sound	675
23.2	Characteristic Impedance	677
23.3	Radiation Impedance	677
23.4	Radiation from a Piston	677
23.5	Directivity	678
23.6	Sound Pressure Produced at Distance r	679
23.7	Electrical Analogue	682
23.8	Diaphragm/Suspension Assembly	685
23.9	Diaphragm Size	685
23.10	Diaphragm Profile	687
23.11	Straight-Sided Cones	688

23.12	Material	690
23.13	Soft Domes	691
23.14	Suspensions	692
23.15	Voice Coil	693
23.16	Moving Coil Loudspeaker	694
23.17	Motional Impedance	697
	Further Reading	703
Chapter 24: Loudspeaker Enclosures		705
24.1	Loudspeakers	705
24.2	The Interrelation of Components	720
Chapter 25: Headphones		731
25.1	A Brief History	731
25.2	Pros and Cons of Headphone Listening	732
25.3	Headphone Types	734
25.4	Basic Headphone Types	741
25.5	Measuring Headphones	743
25.6	The Future	745
VI: Sound Reproduction Systems		747
Chapter 26: Tape Recording		749
26.1	Introduction	749
26.2	Magnetic Theory	750
26.3	The Physics of Magnetic Recording	751
26.4	Bias	752
26.5	Equalization	753
26.6	Tape Speed	754
26.7	Speed Stability	754
26.8	Recording Formats—Analogue Machines	756
Chapter 27: Recording Consoles		761
27.1	Introduction	761
27.2	Standard Levels and Level Meters	762
27.3	Standard Operating Levels and Line-Up Tones	770
27.4	Digital Line-Up	771

27.5	Sound Mixer Architecture and Circuit Blocks.....	771
27.6	Audio Mixer Circuitry	779
27.7	Mixer Automation.....	793
27.8	Digital Consoles.....	795
	References.....	807
Chapter 28: Video Synchronization		809
28.1	Introduction.....	809
28.2	Persistence of Vision.....	809
28.3	Cathode Ray Tube and Raster Scanning.....	810
28.4	Television Signal.....	811
28.5	Color Perception	814
28.6	Color Television.....	816
28.7	Analogue Video Interfaces.....	823
28.8	Digital Video.....	824
28.9	Embedded Digital Audio in the Digital Video Interface.....	834
28.10	Time Code.....	837
Chapter 29: Room Acoustics		841
29.1	Introduction.....	841
29.2	Noise Control.....	842
29.3	Studio and Control Room Acoustics.....	854
VII: Audio Test and Measurement		869
Chapter 30: Fundamentals and Instruments.....		871
30.1	Instrument Types.....	872
30.2	Signal Generators.....	873
30.3	Alternative Waveform Types.....	885
30.4	Distortion Measurement.....	890
Index		891
